CIRCULAR

REF/NEWS LETTER/11/14

DATE: July 10, 2014

Dear Members,

السلام عليكم

This has reference to the unpleasant event that took place at Islamabad on 6th July, 2014 where Captain Zafar misbehaved with very senior member A/E Azhar Khalid and pushed him out of the aircraft without any reason. However, Mr. Azhar Khalid maintained the very professional attitude for which the community is known for & kept high the interest of corporation.

The behavior of said Captain towards aircraft engineer is highly objectionable, therefore all aircraft engineers are instructed that if any cockpit crew misbehaves with aircraft engineer on duty should immediately cancel the aircraft release to service certificate of aircraft and ask the cockpit crew to leave the aircraft and report the incident immediately to the Engineering Management and SAEP.

Thank you,

Muhammad Saleem
President
